

Getting Started on the Google Classroom App (for phones, tablets and other devices)

1. Search for the App Store/Google Play or other place where you download apps for 'Google Classroom' and download it – it's free!
2. Click the app to open it when it downloads
3. Click the 'get started' button when the app opens
4. Add your google child's account
- 5 Your child will need their full Greenfields email account - use the child's full email address eg 13grpbeth@greenfields-pri.co.uk – type carefully and add the password with capital letters in the right place or it will not work

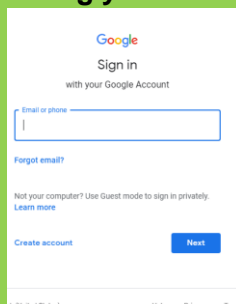

The app will send you alerts when an item is added e.g. if your child's teacher adds homework to do.

If you have more than 1 child, each of them can log in separately in the app and, when you open the app again, screen (4) will show all of the linked accounts so you can choose which child can access.

If you would prefer to use a PC or Mac:

Always use the Chrome browser (not Safari/Internet Explorer/Edge etc). Videos sometimes won't play in other browsers. If you don't have the Chrome browser, you can download it by Googling 'install Chrome browser' and following the links.

- Go to <https://classroom.google.com>
- 'sign in' using your child's **FULL** Greenfields email address and password carefully (as

above).

- Again, you can sign in lots of different accounts, just select the user to change
